ITS4US DEPLOYMENT ACCELERATOR

U.S. Department of Transportation
ITS Joint Program Office

About the ITS4US Deployment Accelerator

The ITS4US Deployment Accelerator Program is a new initiative led by the U.S. DOT's Intelligent Transportation Systems (ITS) Joint Program Office (JPO), in coordination with FTA and support from OST-R.

Up to 5 awardees will deploy programs replicating the Heart of Iowa Regional Transit Agency (HIRTA) **Health Connector project,** which integrates transportation scheduling with healthcare appointment systems.

Period of Performance: 18 months

- **Deployment Period:** 12 months
- **Documentation Period:** 6 months following deployment
- **Solicitation:** Expected 2026

Support for Deployers

Technical expertise

Tested open-source code and middleware

Peer cohort of deployers

BAA Solicitation Timeline

BAA Posted on SAM.gov	Question & Answer Period	Proposal Deadline	Awards Anticipated
2026	2 Weeks Post-BAA Release	45 Days Post-BAA Release	FY2027

Building Off Existing Success

HIRTA's Health Connector integrates mobility-on-demand (MOD) technology with healthcare appointment systems to improve access to non-emergency medical transportation for rural communities.

With Health Connector, riders schedule rides tied directly to medical appointments with real-time wayfinding, on-demand dispatch, and care coordinator tools in one connected system.

HEALTH CONNECTOR

Benefits for Communities

Streamlined messaging between healthcare and transit staff

Improved user experiences for transit-dependent patients

2,000+ rides completed

since August 2024 launch with an **8:1 repeat rider ratio.**

100% of surveyed riders

reported that ride options **met their needs.**

Zero Safety incidents

recorded across all Phase 3 reporting months.

Health Connector Code Available Now

MOD-Medicaid:
Medicaid broker systems → transit dispatch

MOD-EHR:
Appointment data → ride scheduling

HC-Kiosk:
In-facility ride booking terminal
